

A BETTER WAY

OUR VISION FOR A CONFIDENT AMERICA

A Better Way to Fix Health Care

Fact Sheet

A plan to replace Obamacare is the fifth plank of A Better Way, a bold agenda to tackle some of our country's biggest challenges.

WHY WE NEED A BETTER WAY

Obamacare is making things worse by the day. It is driving up premiums and deductible costs for individuals, families, and businesses. It is forcing people off the plans they like. It is fueling waste, fraud, and abuse. And it cannot be fixed. Its knot of regulations, taxes, and mandates cannot be untangled. Obamacare must be fully repealed so we can start over and take a new approach.

WHAT A BETTER WAY LOOKS LIKE

Our plan recognizes that people deserve more patient-centered care, not more bureaucracy. That means more choices, not more mandates. You should have the freedom and the flexibility to choose the care that's best for you. Insurers should compete for your business, and treat you fairly—no matter what. You and your family should have access to the best life-saving treatments in the world. And as you get older, Medicare should give you more choices too. At every step, you should be in the driver's seat.

WHAT OUR PLAN MEANS FOR FAMILIES

- **More choices and lower costs.** Our plan gives you more control and more choices so that you can pick the plan that meets your needs—not Washington's mandates.
- **Real protections and peace of mind.** Our plan makes sure that you never have to worry about being turned away or having your coverage taken away—regardless of age, income, medical conditions, or circumstances.
- **Cutting-edge cures and treatments.** Our plan clears out the bureaucracy to accelerate the development of life-saving devices and therapies.
- **A stronger Medicare.** Our plan protects Medicare for today's seniors and preserves the program for future generations.

A STEP-BY-STEP APPROACH

A Better Way is about going bold and looking past this president to what it will take in the years ahead to get things back on track. So instead of a big bill that no one can understand, this blueprint lays out a step-by-step approach to give every American access to quality, affordable health care. It's just the start of the process. Now we are taking these ideas to the country, so we can give the people a clear choice between the status quo and a better way.
